Mountain Weather Forecast

Brecon Beacons National Park

Forecast valid from 00:00 on Monday 12 Jul 2021 until 23:59 on Tuesday 13 Jul 2021

Forecast Issued on Sunday 11 Jul 2021 at 14:59

Confidence: High for the unsettled start to the week and the trend to increasingly settled and dry conditions from midweek. However lower confidence regards the timing and intensity of any precipitation.

Headline for Monday 12 Jul 2021: Light rain through the morning giving way to afternoon showers.

Forecast for Monday 12 Jul 2021

Weather: Overcast with occasional rain likely through the early hours and at first Monday morning. The rain will become lighter and patchier during the morning, and some brighter spells will develop by early afternoon. However at the same time scattered showers will develop, these possibly turning briefly heavy and thundery before dying away to leave a largely dry if rather cloudy evening.

Chance of cloud free mountain/hill tops above 600m: 20% or less at first, improving to 90% or better around midday.

Visibility: Moderate to poor in rain at first, with areas of cloud blanketing many slopes above 400-500m. Improving to generally good at low levels during the morning as cloud lifts and breaks with only small amounts lingering on some slopes above 800m. Any showers will bring temporarily poor visibility as they pass through.

Meteorologist's View

There will be high UV levels in any sunnier breaks in the afternoon, so adequate sun protection is still recommended.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Tuesday 13 Jul 2021

Weather: Dry with a few clear spells during the early hours, but misty in the valleys beneath any patchy low cloud. Dry with bright spells through the morning, with the afternoon being a mix of sunny spells and isolated showers. Any showers should be short lived leaving a dry evening with some late sunshine.

Maximum wind: Northerly 15mph.

Chance of cloud free mountain/hill tops above 600m: 60% at first improving to 95% or better by mid-morning.

Visibility: Misty beneath any patches of low cloud, which will develop on some slopes above 400-500m during the early hours and at first Tuesday morning. Otherwise generally good or very good visibility with any low cloud lifting clear of the summits by mid-morning, and with only patchy cloud briefly covering slopes above 800m in any showers.

Temperature: **Valleys:** Plus 12 Celsius becoming plus 21 Celsius.
At 600m: Plus 14 Celsius.
Freezing level: Well above the summits.
